Subject: GPLv2 section 3(b) request - complete corresponding source code for FiiO JM21 (firmware 1.1.1)

Dear Sir or Madam,

I am the owner of a FiiO JM21 digital audio player (3 GB / 32 GB variant), running firmware version 1.1.1.

The device contains several loadable kernel modules distributed in binary form whose *.modinfo* sections declare GPL licensing:

```
        cs43198.ko              license=GPL
  dac_core_module.ko        license=GPL v2
  anolog_board_jm21.ko      license=GPL v2
  gw-fpga.ko              license=GPL
  fiio_primary_modules.ko   license=GPL
  fiio_underlay_modules.ko  license=GPL
  fiio_headset_jack.ko      license=GPL
  fiio_snd_soc_dummy_dai.ko license=GPL
  fiio_config.ko            license=GPL
  fiio_gpio_debug_module.ko license=GPL
```

Please note that the filename *anolog_board_jm21.ko* is reproduced exactly as shipped in the firmware; it is spelled with an "o" in the device, in the device tree *(fiio,anolog_board)* and in the module itself.

Under section 3(b) of the GNU General Public License version 2, these binaries were distributed to me together with a written offer to provide the complete corresponding source code. I hereby exercise that offer as a recipient of the device.

I request:

1. The complete corresponding source code for the modules listed above (or the kernel tree from which they were built), including Kconfig/Makefile files and any out-of-tree module directories.
2. The kernel .config used for this build.
3. The exact base revision and the patch set applied on top of it. From the device banner, the base appears to be 5.15.41-android13-8-g9ded8564ff52 with local modifications (suffix -dirty).
4. The toolchain used (the banner reports Android clang 14.0.7 and LLD 14.0.7).
5. Any build or packaging scripts needed to reproduce these modules.

For identification of the exact build, the build fingerprint, kernel version, vermagic and the SHA-256 hash of each module are listed in the enclosure.

If the source is already published, a download link is sufficient. I am happy to cover reasonable costs of media and shipping if it must be sent physically, as permitted by GPLv2 section 3.

I would appreciate a reply within 30 days. If this request cannot be fulfilled directly, please forward it to the person or team responsible for your open-source compliance.

Thank you for your attention.

Yours faithfully,

[NOME COMPLETO]
